

Stakeholder Consultation Questionnaire: Exemption No. 8(f)(b)

“Lead in compliant pin connector systems other than the mating area of vehicle harness connectors”

Abbreviations and Definitions

ELV Directive Directive 2000/53/EC

Background

The Oeko-Institut and Fraunhofer IZM have been appointed by the European Commission, within a framework contract¹, for the review of exemptions in Annex II of Directive 2000/53/EC (ELV). The aim of this project is to evaluate whether the use of lead in the above mentioned exemption is still unavoidable and if the continuation of the exemption is therefore justified in line with Art. (4)(2)(b)(ii) of the ELV Directive.

In the last review² of exemption 8(f) under the ELV Directive³ in 2015, the consultants recommended rewording the exemption and splitting it into separate items to exclude the use of lead in compliant pin connector systems where lead-free solutions are available, and to restrict it to those areas where the use of lead is still unavoidable so that Art. 4(2)(b)(ii) justifies the continuation of the exemption. The result was the current wording of exemption 8(f)(b). The exemption is due for review in 2019.

This questionnaire has been prepared for the stakeholder consultation held as part of the evaluation. The objective of this consultation and the review process is to collect and to evaluate information and evidence according to the criteria listed in Art. (4)(2)(b)(ii) of Directive 2000/53/EC (ELV), which you can download from here:

<http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:32000L0053>

Additional background information can be found on the exemption page accessible through the following link: <http://elv.exemptions.oeko.info/index.php?id=68>

If you would like to contribute to the stakeholder consultation, please answer the following questions:

¹ The contract is implemented through Framework Contract No. FWC ENV.A.2/FRA/2015/0008 of 27/03/2015, led by Oeko-Institut e.V.

Questions

1. Please explain whether the use of lead in the application addressed under Exemption 8(f)(b) of the ELV Directive is still unavoidable so that Art. 4(2)(b)(ii) of the ELV Directive would justify the continuation of the exemption. Please be specific with your answer, for example clarify, if applicable, what types of vehicles your answer refers to, i.e., conventional vehicles and various types of hybrid and electric vehicles, and which functionalities and applications the exemption still needs to cover.
2. Please explain the efforts your organisation has undertaken to find and implement the use of lead-free alternatives for automotive uses. Please refer to alternatives, which at least reduce the amount of lead applied or eliminate its necessity altogether.
3. Please provide a roadmap specifying the necessary steps/achievements in research and development including a time scale for the substitution or elimination of lead in this exemption.
4. What is the amount of lead that will be contained in the applications in the scope of this exemption in vehicles
 - a. placed on the EU market and
 - b. worldwide
 in case the exemption remains valid? Please provide a substantiated estimate clarifying how you have arrived at the stated result.
5. Overall, please let us know whether you agree with the necessity to continue the exemption and sum up your arguments for or against its continuation.

In case parts of your contribution are confidential, please provide your contribution in two versions (public /confidential). Please also note, however, that requested exemptions cannot be granted based on confidential information!

Finally, please do not forget to provide your contact details (Name, Organisation, e-mail and phone number) so that Oeko-Institut/Fraunhofer IZM can contact you in case there are questions concerning your contribution.
